

I am writing to express my disire that the FCC will not weaken NJ's Do Not Call law. Since this law was enacted annoying calls from telemarketers have completely stopped and that's the way we, as PRIVATE citizens in the state of New Jersey want it. Before the NJ Do Not Call Act, I would receive 3-4 unwanted calls per night from telemarketers. As an adult, if I want someone's service I will contact them myself. I do not want nor need for them to invade my private home life. Please DO NOT weaken our civil rights by allowing these pushy and often times obnoxious cretons back into our quiet, private lives. Thank you for your consideration.
